

Ideation Phase

Problem Statements Definition

Date	13 July 2026
Team ID	
Project Name	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau
Maximum Marks	2 Marks

Customer Problem Statement Template

A well-articulated customer problem statement helps the team find the ideal solution for the challenges real users of this housing analysis face. The two problem statements below frame the project from the perspective of the two primary user groups: home buyers and real estate analysts.

Problem Statements

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a prospective home buyer researching properties in the King County area	evaluate whether a listed sale price is fair given the home's features (bedrooms, bathrooms, square footage, condition, and age)	I cannot easily compare a property against similar homes that have recently sold	housing sale data is scattered across multiple sources and is not organized by comparable features	uncertain and anxious about overpaying
PS-2	a real estate analyst advising clients on pricing strategy	understand how renovation history and house age influence final sale prices	I don't have a clear, visual breakdown of sales trends by renovation status and age group	the raw housing dataset (21,609+ records) is too large to interpret manually and isn't summarized into digestible insights	frustrated by the time spent manually filtering and cross-referencing spreadsheets
