

Requirement Analysis Phase

Data Flow Diagram & User Stories

Date	13 July 2026
Team ID	
Project Name	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau
Maximum Marks	4 Marks

Data Flow Diagram

The diagram below shows how data moves through the project: from the raw housing dataset, through cleaning and visualization in Tableau, into the final dashboard and story, and out to the analyst/mentor as the end user.

User Stories

The table below lists the user stories for this project.

User Type	Functional Requirement (Epic)	User Story No.	User Story / Task	Acceptance Criteria	Priority	Release
Data Analyst	Data Collection & Extraction	USN-1	As a data analyst, I can connect the housing dataset (CSV) to Tableau so that I can begin building visualizations.	Dataset loads successfully in Tableau with correct data types and row count (21,609).	High	Sprint-1
	Data Preparation	USN-2	As a data analyst, I can verify the dataset for nulls and duplicates so that my visualizations reflect accurate, clean data.	Data source confirmed to have 0 null values; duplicates identified and noted.	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story No.	User Story / Task	Acceptance Criteria	Priority	Release
	Data Visualization	USN-3	As a data analyst, I can create charts showing sale price against house features (age, renovation, bedrooms, bathrooms, floors) so that I can identify pricing patterns.	4 worksheets built covering all 6 required visualizations, with values matching target benchmarks.	High	Sprint-1
	Dashboard	USN-4	As a data analyst, I can combine my visualizations into one dashboard so that stakeholders can explore insights interactively.	Dashboard renders all sheets without overlap, includes at least one working filter.	High	Sprint-2
	Storyboard	USN-5	As a data analyst, I can create a guided story so that non-technical viewers can follow the key insights step by step.	Story contains multiple points walking through dashboard insights with captions.	Medium	Sprint-2
	Performance Testing	USN-6	As a data analyst, I can document data volume, filters used, and visualization count so that dashboard performance is transparent.	Written summary includes row count, filter list, and visualization count.	Medium	Sprint-2
	Documentation & Demo	USN-7	As a data analyst, I can record a demo video and write step-by-step documentation so that the project can be reviewed end-to-end.	Video (3-5 min) and written documentation uploaded with working links.	High	Sprint-2

User Type	Functional Requirement (Epic)	User Story No.	User Story / Task	Acceptance Criteria	Priority	Release
Mentor / Reviewer	Project Review	USN-8	As a mentor, I can view the published dashboard, story, and demo video so that I can evaluate project completeness.	Demo link and GitHub repo link are accessible and functional.	High	Sprint-2
