

Project Design Phase

Problem – Solution Fit Template

Date	13 July 2026
Team ID	
Project Name	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why.

Template (filled for this project):

1. CUSTOMER SEGMENT(S) Home buyers, home sellers, and real estate market analysts/investors evaluating King County-style residential properties.	5. AVAILABLE SOLUTIONS Manually reviewing raw spreadsheet/CSV data; browsing individual listing sites (e.g. Zillow) for one house at a time; relying on a real estate agent's opinion; building one-off Excel charts. These lack an aggregate, visual view of price-driving factors across the market.	6. CUSTOMER CONSTRAINTS Limited technical/data-analysis skills; little time to manually process thousands of records; need a free/no-cost tool; need only a web browser and internet access to view results.
2. JOBS-TO-BE-DONE / PROBLEMS Understand what actually drives a house's sale price; judge whether renovation history affects value; compare price against age, size, condition, and room count without manually crunching raw data.	9. PROBLEM ROOT CAUSE Raw housing data is large (~21,600 records), unstructured for non-technical users, and there is no easy, centralized visual tool that combines price, renovation, age, and feature data together in one place.	7. BEHAVIOUR Searching listing sites and market reports; asking agents or family/friends for pricing opinions; comparing similar homes zipcode by zipcode; looking up renovation examples to gauge value impact.
3. TRIGGERS Preparing to buy, sell, or list a house; noticing inconsistent pricing across similar listings; needing a quick reference before making an offer; a mentor/manager requesting a market analysis.	10. YOUR SOLUTION An interactive Tableau dashboard and storyboard visualizing ~21,600 housing records — combining a KPI summary, a renovation-based sales histogram, a house-age-by-renovation pie chart, and a bedroom/bathroom/floor age bar chart into one easy-to-navigate	8. CHANNELS OF BEHAVIOUR 8.1 Online Real estate listing sites, Google searches, real estate forums/blogs, social media groups. 8.2 Offline Conversations with real estate agents, word-of-mouth from friends/family, open house visits.

	view, published free via Tableau Public.	
4. EMOTIONS: BEFORE / AFTER Before: confused and overwhelmed by scattered raw data, unsure which features matter. After: informed and confident in pricing or negotiation decisions, with a clear picture of market patterns.
